The Big Healeys John Nikas 2017-07-15 With their sleek and powerful looks, the big Austin-Healeys have always made an impression. In this revealing book, the author explores the development of the ‘Big’ Healeys, as distinct from the smaller Austin-Healey Sprite, to produce a comprehensive and compelling account of one of the iconic British sports cars.After Donald Healey’s sports car design impressed the managing director of Austin, Leonard Lord, at the 1952 London Motor Show, Healey was given the engineering back-up that he needed to produce the car in quantity. Teaming up with Jensen Motors to produce the bodywork, Austin provided the mechanical components at their Longbridge factory. The new car was known as the Austin-Healey 100, because it could achieve 100 mph.This book also follows the development of the Austin-Healey 100-Six and the Austin-Healey 3000, describing both the technical developments and the achievements of the cars in competitions and as record-breakers.Every enthusiast of the marque should have this comprehensive review of the design and manufacture of the Big Healeys on their bookshelf, which reveals previously untold stories to tell you the real story of these magnificent vehicles and the men that made them possible.Gerry Coker, Austin-Healey Designer

Austin-Healey Sprite MG Midget Owner's Workshop Manual 1958-1971 948 CC - 1098 CC - 1275 CC Floyd Clymer 2015-03-31 344 pages, with more than 200 illustrations and charts, size 5.5 x 8.5 inches. Originally published under the title 'Sprite and Midget Owner's Manual and Service Manual' by Floyd Clymer just prior to his untimely death in 1970, this revised and updated edition was republished in 2015 by VelocePress. Written in easy to understand language, this is possibly the most user-friendly and comprehensive owner's workshop manual ever published for the 948cc, 1098cc and 1275cc series of Austin-Healey Sprites and MG Midgets. The contents of the original Clymer manual have now been reformatted into three separate sections appropriate to the three different engines that were used in this series of automobiles between 1958 through 1971. There is an engine/chassis 'Model Identification Chart' followed by a 'General Data' section that includes complete technical specifications for each model listed within the 'Model Identification Chart'. There are detailed instructions for the overhaul, service and maintenance of the major mechanical and electrical components for the 948cc, 1098cc and 1275cc engines. In addition, the 1275cc engine section includes comprehensive emission control information and test data. There are also additional wiring diagrams that were not included in the original 1970 publication. Finally, there is a section on 'Increasing Power and Performance' that also includes detailed step-by-step instructions and illustrations for the installation of a Judson Supercharger. The reproduction of a factory handbook included in the original Clymer publication has been omitted due to the fact that there were numerous variations of the official BMC handbook that were issued during the production run of this series of automobiles. Therefore, it is recommended that this manual be used in conjunction with the 'Owners Handbook' that was issued with your automobile. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all 'Spridget' owners, restorers and enthusiasts worldwide. *MG Midget and Austin Healey Sprite* Chilton Book Company 1995-01 Chilton is pleased to distribute Porter Repair Manuals in North America. Austin Healey Sprite, Mk. I Handbook Brooklands Books Ltd 1987-04-01 Instruments and controls, driving instructions, maintenance, etc.

Austin Healey 100-6 & 3000 Graham Robson 2016-01-12 In nine eventful years - 1957 to 1965 - the six-cylinder-engined Austin Healey evolved into a formidable and increasingly specialised rally car. By any standards, it was the first of the "homologation specials" - a type made progressively stronger, faster, more versatile, and more suitable for the world's toughest International rallies. Though the motorsport foundations had been laid by the Healey Motor Co. Ltd, the work needed to turn these cars into rock-sold 210bhp projectiles was almost all completed by the world-famous "works" BMC Competitions Department at Abingdon. It was because of their vast experience that the "Big Healeys" as they were always affectionately known - became

Austin Healey Sprite

fast and tough, nimble yet durable, so that they were capable of winning major events wherever traction could be assured. Not only did the "works" Austin Healeys win some of the world's most famous events - including Liege-Sofia-Liege, Spa-Sofia-Liege and the French and Austrian Alpine rallies, but they were also supremely fast on events like the Tulip, and came so close, so often, to winning their home event, the British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each and every success, each and every notable car, and traces exactly how the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library.

Frogeye Sprite John Baggott 2013-11-30 Frogeye Sprite - The Complete Story is the only book to have been written exclusively about the iconic Mark 1 Austin Healey Sprite. The headlights in the bonnet and unusual radiator grill shape gave the car a cheeky grin, so it soon gained the name 'Frogeye'. The book covers the full story of the design, development and manufacture of the Sprite, including the considerable success of the car in racing and rallying. Topics covered include: the car's racing success with drivers such as Stirling Moss, John Sprinzel, Paddy Hopkirk and Alec Poole; the special-bodied and bespoke grand touring versions such as the Sebring Sprite, Alexander GT and Lenham GT, plus the one-off Lumbertubs Sprite; modern day Sprites - new-builds and restorations; owners' experiences of living with and driving the Frogeye; information about clubs and support for owners. Foreword by Bic Healey. This simply-designed British sports car continues to be held in high esteem fifty-five years after it was launched, and this history is superbly illustrated with 270 full colour photographs.
