Annual Plant Reviews, Biochemistry of Plant Secondary Metabolism Michael Wink 2011-06-13 This brand new Annual Plant Reviews volume is the second edition of the highly successful and well-received Annual Plant Reviews, Volume 2. This exciting new volume provides an up-to-date survey of the biochemistry and physiology of plant secondary metabolism. The volume commences with an overview of the biochemistry, physiology and function of secondary metabolism, followed by detailed reviews of the major groups of secondary metabolites: alkaloids and betalains, cyanogenic glucosides, glucosinolates and nonprotein amino acids, phenyl propanoids and related phenolics, terpenoids, cardiac glycosides and saponins. A final chapter discusses the evolution of secondary metabolism. This carefully compiled new edition brings together chapters from some of the world's leading experts in plant secondary metabolism. Completely revised and brought right up to date with much new information, this volume is an essential purchase for advanced students, researchers and professionals in biochemistry, physiology, molecular biology, genetics, plant sciences, agriculture, medicine, pharmacology and pharmacy, working in the academic and industrial sectors, including those working in the pesticide and pharmaceutical industries. Libraries in all universities and research establishments where these subjects are studied and taught will need copies of this excellent volume on their shelves. A companion volume Annual Plant Reviews Volume 39, Functions and Biotechnology of Plant Secondary Metabolites, Second Edition, Edited by M. Wink, is also available.

Fire Bringer David Clement-Davies 2000 In ancient Scotland, a tyrannical new lord of the herd plans complete dominion over the animal world, but deer lore promises a hero, who has a unique bond with all creatures, including man, and who will ignite an epic battle and free the herd forever. An ALA Best Book for Young Adults. Reprint.

Cross and Tapper on Evidence Colin Tapper 2007 Cross and Tapper on Evidence discusses the theory and practice of this field, and provides criticism and comment on the law, drawing on numerous recent cases to illustrate the workings of the law. It has been fully revised and rewritten to take into account the radical and controversial newCriminal Justice Act 2003. Major changes brought about by the new legislation, including those relating to the effect on acquittals, all the rules relating to character, and the hearsay rule in criminal cases, have been fully incorporated into the text.

Campbell's Operative Orthopaedics Willis Cohoon Campbell 1992

Antibiotics and Bacterial Resistance Wiley 2013-01-14 The need for novel antibiotics is greater now than perhaps anytime since the pre-antibiotic era. Indeed, the recent collapse ofmany pharmaceutical antibacterial groups, combined with theemergence of hypervirulent and pan-antibiotic-resistant bacteriahas severely compromised infection treatment options and led todramatic increases in the incidence and severity of bacterialinfections. This collection of reviews and laboratory protocols gives thereader an introduction to the causes of antibiotic resistance, thebacterial strains that pose the largest danger to humans (i.e.,streptococci, pneumococci and enterococci) and the antimicrobialagents used to combat infectionswith these organisms. Some newavenues that are being investigated for antibiotic development arealso discussed. Such developments include the discovery of agentsthat inhibit bacterial RNA degradation, the bacterial ribosome, andstructure-based approaches to antibiotic drug discovery. Two laboratory protocols are provided to illustrate differentstrategies for discovering new antibiotics. One is a bacterialgrowth inhibition assay to identify inhibitors of bacterial growththat specifically target conditionally essential enzymes in thepathway of interest. The other protocol is used to identifyinhibitors of bacterial cell-to-cell signaling. This e-book – a curated collection from eLS, WIREs, andCurrent Protocols – offers a fantastic introduction to thefield of antibiotics and antibiotic resistance for students orinterdisciplinary collaborators. Table of Contents: Introduction Antibiotics and the Evolution of Antibiotic Resistance eLS Jose L Martinez, Fernando Baquero Antimicrobials Against Streptococci, Pneumococci andEnterococci eLS Susan Donabedian, Adenike Shoyinka Techniques & Applications RNA decay: a novel therapeutic target in bacteria WIREs RNA Tess M. Climate Change and Cities Cynthia Rosenzweig 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

Towards a Comparative Political Economy of Unfree Labour Dr Tom Brass 2015-12-22 Many works about agrarian change in the Third World assumes that unfree relations are to be eliminated in the course of capitalist development. This text argues that the incidence of bonded labour is greater than supposed, and that in certain situations rural employers prefer an unfree workforce.

Smith and Hogan's Criminal Law David Ormerod 2011-07-28 'Criminal Law' is written with the needs of the student foremost in mind to provide, more than ever, as modern and as comprehensive an exposition of the criminal law as he or she could possibly require.

Cheshire, Fifoot, and Furmston's Law of Contract M. P. Furmston 2017 "[This book provides an] account of the principles of the law of contract with...analysis and insights...Each topic is clearly signposted with summaries, introductory text and sub-headings for ease of navigation throughout the book. Numerous references to additional primary and secondary sources take the reader even further into the subject."--

The Archaeology of the Bronze Age Levant Raphael Greenberg 2019-10-31 An up-to-date, systematic depiction of Bronze Age societies of the Levant, their evolution, and their interactions and entanglements with neighboring regions.

Nordic Noir, Adaptation, Appropriation Linda Badley 2020-05-06 This book argues that adaptation is an underrecognized yet constitutive element of Nordic noir. In so doing, it reframes the prevailing critical view. Now celebrated for its global sweep, Nordic noir is equally a transmedial phenomenon. Nordic Noir, Adaptation, Appropriation deploys the tools of current adaptation studies to undertake a wide-ranging transcultural, intermedial exploration, adding an important new layer to the rich scholarship that has arisen around Nordic noir in recent years.

Cross & Tapper on Evidence Colin Tapper 2010-07-15 Cross & Tapper continues to provide exceptionally clear and detailed coverage of the modern law of evidence, with an element of international comparison. The foremost authority in the area, it is a true classic of legal literature.

Conjunctive Markers of Contrast in English and French Maité Dupont 2021-06-15 Situated at the interface between corpus linguistics and Systemic Functional Linguistics, this volume focuses on conjunctive markers expressing contrast in English and French. The frequency and placement patterns of the markers are analysed using large corpora of texts from two written registers: newspaper editorials and research articles. The corpus study revisits the long-standing but largely unsubstantiated claim that French requires more explicit markers of cohesive conjunction than English and shows that the opposite is in fact the case. Novel insights into the placement preferences of English and French conjunctive markers are provided by a new approach to theme and rheme that attaches more importance to the rheme than previous studies. The study demonstrates the significant benefits of a combined corpus and Systemic Functional Linguistics approach to the cross-linguistic analysis of cohesion.

Electronic Evidence Stephen Mason 2017-05 This fourth edition of the well-established practitioner text sets out what constitutes an electronic signature, the form an electronic signature can take, and discusses the issues relating to evidence - illustrated by analysis of relevant case law and legislation from a wide range of common law and civil law jurisdictions. Stephen Mason is a leading authority on electronic signatures and electronic evidence, having advised global corporations and governments on these topics. He is also the editor of Electronic Evidence and International Electronic Evidence, and he founded the international open-source journal Digital Evidence and Electronic Signature Law Review in 2004. This book is also available online at http: //ials.sas.ac.uk/digital/humanities-digital-library/observing-law-ials-open-book-service-law.

Why Forests? Why Now? Frances Seymour 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time-averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation.

Why Forests? Why Now? synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

International Electronic Evidence Stephen Mason 2008 An increasing number of civil and criminal proceedings involve the use of digital evidence across jurisdictional boundaries. Digital evidence now affects every aspect of law, including contract, employment, family, crime, intellectual property, and land law. In effect, no area of law is excluded, and digital evidence has become of greater importance now that the Internet has become ubiquitous. It is increasingly apparent that criminals and terrorists target the electronic environment in order to steal, to carry out extortion, and to abuse children across jurisdictions. Additionally, both public and commercial organizations now rely on the digital environment to such an extent that it has become critical to business and, perhaps, the survival of the state. International Electronic Evidence provides an outline of the substantive law of evidence, admissibility, disclosure, and procedural requirements in respect of digital evidence for the jurisdictions covered, which include: Argentina, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Japan, Latvia, Lithuania, Luxembourg, Malta, Mexico, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Thailand, and Turkey.

Cross and Tapper on Evidence Roderick Munday 2018 Cross & Tapper continues to provide exceptionally clear and detailed coverage of the modern law of evidence, with an element of international comparison. The foremost authority in the area, it is a true classic of legal literature.

The Politics Industry Katherine M. Gehl 2020-06-23 Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In The Politics Industry, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. The Politics Industry is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

The Pacific Reporter 1981

Legalism Paul Dresch 2012-08-30 Law and law-like institutions are visible in human societies very distant from each other in time and space. When it comes to observing and analysing such social constructs historians, anthropologists, and lawyers run into notorious difficulties in how to conceptualize them. Do they conform to a single category of 'law'? How are divergent understandings of the nature and purpose of law to be described and explained? Such questions reach to the heart of philosophical attempts to understand the nature of law, but arise whenever we are confronted by law-like practices and concepts in societies not our own. In this volume leading historians and anthropologists with an interest in law gather to analyse the nature and meaning of law in diverse societies. They start from the concept of legalism, taken from the anthropologist Lloyd Fallers, whose 1960s work on Africa engaged, unusually, with jurisprudence. The concept highlights appeal to categories and rules. The degree to which legalism in this sense informs people's lives varies within and between societies, and over time, but it can colour equally both 'simple' and 'complex' law. Breaking with recent emphases on 'practice', nine specialist contributors explore, in a wide-ranging set of cases, the place of legalism in the workings of social life. The essays make obvious the need to question our parochial common sense where ideals of moral order at other times and places differ from those of modern North Atlantic governance. State-centred law, for instance, is far from a 'central case'. Legalism may be 'aspirational', connecting people to wider visions of morality; duty may be as prominent a theme as rights; and rulers from thirteenth-century England to sixteenth-century Burma appropriate, as much they impose, a vision of justice as consistency. The use of explicit categories and rules does not reduce to simple questions of power. The cases explored range from ancient Asia Minor to classical India, and from medieval England and France to Saharan oases and southern Arabia. In each case they assume no knowledge of the society or legal system discussed. The volume will appeal not only to historians and anthropologists with an interest in law, but to students of law engaged in legal theory, for the light it sheds on the strengths and limitations of abstract legal philosophy.

Towards Resilient Organizations and Societies Rómulo Pinheiro 2021-11-16 This open access book brings together scholars in the fields of management, public policy, regional studies, and organization theory around the concept of resilience. The aim is to provide a more holistic understanding of the complex phenomenon of resilience from a multi-sectorial, cross-national, and multidisciplinary perspective. The book facilitates a conversation across diverse disciplinary specializations and empirical domains. The authors contribute both to theory testing and theory development and provide key empirical insights useful for societies, organizations, and individuals experiencing disruptive pressures, not least in the context of a post-COVID-19 world. Diverse chapters are held together by a clear organization of the volume across levels of analysis (resilience in organizations and societies) and by an original perspective on resilience derived from an extended review, by the editors, of the existing literature and knowledge gaps, according to which each of the individual chapter contributions is positioned and connected to.

Locating Nordic Noir Kim Toft Hansen 2017-10-14 This book is a comprehensive study of Nordic Noir television drama from the 1990's until today. The authors introduce the history of contemporary Nordic Noir from the perspective of place, production and location studies. The chapters include readings of well-known television crime dramas such as Beck, The Killing, Trapped and The Bridge as well as a range of other important Nordic Noir cases. The authors position the development of Nordic Noir in the global market for popular television drama and place the international attention towards Nordic crime dramas within regional development of drama production in Sweden, Denmark, Norway and Iceland. Consequently, Nordic Noir is read as both a transnational financial and creative phenomenon and as a local possibility for community building. Offering a comprehensible, scholarly and methodologically original approach to the popularity of Nordic television crime dramas, this volume is aimed at readers with an interest in crime drama as well as scholars and students of television drama.

Tsarina Ellen Alpsten 2020-11-10 "Makes Game of Thrones look like a nursery rhyme." –Daisy Goodwin, New York Times bestselling author of The Fortune Hunter “[Alpsten] recounts this remarkable woman’s colourful life and times.” –Count Nikolai Tolstoy, historian and author Before there was Catherine the Great, there was Catherine Alexeyevna: the first woman to rule Russia in her own right. Ellen Alpsten's rich, sweeping debut novel is the story of her rise to power. St. Petersburg, 1725. Peter the Great lies dying in his magnificent Winter Palace. The weakness and treachery of his only son has driven his father to an appalling act of cruelty and left the empire without an heir. Russia risks falling into chaos. Into the void steps the woman who has been by his side for decades: his second wife, Catherine Alexeyevna, as ambitious, ruthless and passionate as Peter himself. Born into devastating poverty, Catherine used her extraordinary beauty and shrewd intelligence to ingratiate herself with Peter’s powerful generals, finally seducing the Tsar himself. But even amongst the splendor and opulence of her new life—the lavish feasts, glittering jewels, and candle-lit hours in Peter’s bedchamber—she knows the peril of her position. Peter’s attentions are fickle and his rages powerful; his first wife is condemned to a prison cell, her lover impaled alive in Red Square. And now Catherine faces the ultimate test: can she keep the Tsar’s death a secret as she plays a lethal game to destroy her enemies and take the Crown for herself? From the sensuous pleasures of a decadent aristocracy, to the incense-filled rites of the Orthodox Church and the terror of Peter’s torture chambers, the intoxicating and dangerous world of Imperial Russia is brought to vivid life. Tsarina is the story of one remarkable woman whose bid for power would transform the Russian Empire.
