The Intimate Critique Diane P. Freedman 1993 For a long time now, readers and scholars have strained against the limits of traditional literary criticism, whose precepts—above all, "objectivity"—seem to have so little to do with the highly personal and deeply felt experience of literature. The

Intimate Critique marks a movement away from this tradition. With their rich spectrum of personal and passionate voices, these essays challenge and ultimately breach the boundaries between criticism and narrative, experience and expression, literature and life. Grounded in feminism and connected to the race, class, and gender paradigms in cultural studies, the twenty-six contributors to this volume—including Jane Tompkins, Henry Louis Gates, Jr., Shirley Nelson Garner, and Shirley Geok-Lin Lim—respond in new, refreshing ways to literary subjects ranging from Homer to Freud, Middlemarch to The Woman Warrior, Shiva Naipaul to Frederick Douglass. Revealing the beliefs and formative life experiences that inform their essays, these writers characteristically recount the process by which their opinions took shape—a process as conducive to self-discovery as it is to critical insight. The result—which has been referred to as "personal writing," "experimental critical

writing," or "intellectual autobiography"—maps a dramatic change in the direction of literary criticism. Contributors. Julia Balen, Dana Beckelman, Ellen Brown, Sandra M. Brown, Rosanne Kanhai-Brunton, Suzanne Bunkers, Peter Carlton, Brenda Daly, Victoria Ekanger, Diane P. *Instrumental Music Education*

Evan Feldman 2015-12-21

*Instrumental Music Education: Teaching with the Musical and Practical in Harmony*, 2nd Edition is intended for college instrumental music education majors studying to be band and orchestra directors at the elementary, middle school, and high school levels. This textbook presents a research-based look at the topics vital to running a successful instrumental music program, while balancing musical, theoretical, and practical approaches. A central theme is the compelling parallel between language and music, including "sound-to-symbol" pedagogies. Understanding this connection improves the teaching of melody, rhythm, composition, and improvisation. The companion website contains over 120 pedagogy videos for wind, string, and percussion instruments, performed by professional players and teachers, over 50 rehearsal

videos, rhythm flashcards, and two additional chapters, "The Rehearsal Toolkit," and "Job Search and Interview." It also includes over 50 tracks of acoustically pure drones and demonstration exercises for use in rehearsals, sectionals and lessons. New to this edition:

- Alternative, non-traditional ensembles: How to offer culturally relevant opportunities for more students, including mariachi, African drumming, and steel pans.
- More learning and assessment strategies
- The science of learning and practicing: How the brain acquires information
- The philosophies of Orff and El Sistema, along with the existing ones on Kodály, Suzuki, and Gordon.
- The Double Pyramid of Balance: Francis McBeth's classic system for using good balance to influence tone and pitch.
- Updated information about copyright for the digital age

**To Kill a Mockingbird** Harper Lee 2014-07-08 Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one

man in the face of blind and violent hatred One of the most cherished stories of all time, To Kill a Mockingbird has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Teaching Company 2011 All writing--whether it's an essay, a personal letter, or a detailed business report--is at its most memorable when it's built on the fundamental and critical skills that transform your words from good to great. The first lectures provide the first key to more engaging and effective writing:

understanding literary genres and the ways their unique styles can shape and inform your own voice. The focus then shifts to the art of rhetoric and the ways it can help you adapt your writing to a variety of situations. The final part is a step-by-step guide through the writing process in its four major stages: researching, first draft, editing and rewriting.

### **How to Critique Journal Articles in the Social**

**Sciences** Scott R. Harris  
2013-09-23 How to Critique Journal Articles in the Social Sciences, by Scott R. Harris, is a brief, introductory book that provides readers with a step-by-step guide to reading and understanding a social science research article. The author demonstrates the many strengths of social research, including its advantages over ordinary ways of knowing things, and, at the same time, points out that research is inevitably flawed. Rather than naively assuming that good research simply produces “The Truth” or cynically asserting that research is hopelessly biased and futile, this book instills in readers a critical perspective—one that appreciates the strengths and weaknesses of any piece of scholarship.

### **Talking to Strangers**

Malcolm Gladwell 2019-09-10

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn’t true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the

suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

### **Nursing Research Critique**

Karen Bauce 2018 Fosters fundamental skills needed to critically evaluate evidence from published research studies This is the first resource to provide APRN students and practicing clinicians with a step-by-step guide to critically analyze evidence from research studies. As part of a profession that relies on best evidence,

nurses need to be able to effectively assess research articles. Equipped with these skills, nurses will lead an informed practice and improve patient care. With 14 qualitative and quantitative studies, chapters use previously published research articles to demonstrate the actual critique process. This text delves past outlining the elements of critique to teach by example, walking through every part of a research article, from the title to the conclusion, and highlighting specific queries which need to be answered to craft a strong critique. The research articles in this book offer a broad range of clinical areas and diverse methodologies to highlight the fundamental differences between qualitative and quantitative studies, their underlying paradigms and relative strengths and weaknesses. With a consistent, robust critiquing template, this content can easily be applied to countless additional research studies. Key Features:

Where the Crawdads Sing  
(Movie Tie-In) Delia Owens  
2022-06-28 NOW A MAJOR  
MOTION PICTURE The #1  
New York Times bestselling  
worldwide sensation with more  
than 12 million copies sold, “a  
painfully beautiful first novel  
that is at once a murder  
mystery, a coming-of-age  
narrative and a celebration of  
nature” (The New York Times  
Book Review). For years,  
rumors of the “Marsh Girl”  
have haunted Barkley Cove, a  
quiet town on the North  
Carolina coast. So in late 1969,  
when handsome Chase  
Andrews is found dead, the  
locals immediately suspect Kya  
Clark, the so-called Marsh Girl.  
But Kya is not what they say.

Sensitive and intelligent, she  
has survived for years alone in  
the marsh that she calls home,  
finding friends in the gulls and  
lessons in the sand. Then the  
time comes when she yearns to  
be touched and loved. When  
two young men from town  
become intrigued by her wild  
beauty, Kya opens herself to a  
new life—until the unthinkable  
happens. Where the Crawdads  
Sing is at once an exquisite ode  
to the natural world, a  
heartbreaking coming-of-age  
story, and a surprising tale of  
possible murder. Delia Owens  
reminds us that we are forever  
shaped by the children we once  
were, and that we are all  
subject to the beautiful and  
violent secrets that nature  
keeps.

Now, in this dazzling collection of nine entirely original essays, written with a rare combination of give and

sharpness, wit and fearlessness, she delves into the forces that warp our vision, demonstrating an unparalleled stylistic potency and critical dexterity. Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each essay, Tolentino writes about a cultural prism: the rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine’s journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino’s sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound

honesty, Trick Mirror is an instant classic of the worst decade yet. FINALIST FOR THE PEN/DIAMONSTEIN-SPIELVOGEL AWARD FOR THE ART OF THE ESSAY

**Action Research** Davydd J. Greenwood 1999-04-15 Supported bilaterally by Sweden and Norway, the Scandinavian Action Research Development Program (ACRES — Action Research in Scandinavia) emphasized conceptualizing research questions and self-conscious writing processes for experienced action researchers. Participants came from Norway, Sweden, Finland, Holland, Great Britain, and the United States. A learning experiment in the tradition of Scandinavian industrial

democracy, ACRES had both intellectual and organizational tensions common to action research projects. This book includes theoretical and historical overviews of action research, reflections on the writing process, narratives about the design and difficult internal processes of ACRES, and a selection of the participants' writings. A particularly unique feature of the book is the discussion of the problematic relationship between action research and conventional modes of research writing and an analysis of the complex social processes collaboratively managed projects create, in combination with a set of participant cases.

### **How to Read and Critique a Scientific Research Article**

Foong May Yeong 2014 Given the explosion of information and knowledge in the field of Life Sciences, adapting primary literature as materials in course work as part of active learning seems to be more effective in improving scientific literacy among science undergraduates than the pure transmission of content knowledge using traditional textbooks. In addition, students also read research articles as part of undertaking laboratory research projects useful for preparing them for graduate school. As such, a good grasp of reading and analytical skills is needed for students to understand how their research project contributes to the field that they are working in. Such skills are being taught at UK and USA universities. In Asia, this approach in teaching has not yet been as widespread, although similar ideas are beginning to be used in education. Written as a quick guide for undergraduate students and faculty members dealing with scientific research articles as part of a module or

research project, this book will be useful, especially in Asia, for students and faculty members as the universities look to incorporating the use of scientific research articles in their undergraduate teaching. For Life Science students, the first time they encounter a primary literature can be rather daunting, though with proper guidance, they can overcome the initial difficulties and become confident in dealing with scientific articles. This guidebook provides a structured approach to reading a research article, guiding the reader step-by-step through each section, with tips on how to look out for key points and how to evaluate each section. Overall, by helping undergraduate students to overcome their anxieties in reading scientific literature, the book will enable the students to appreciate better the process of scientific investigations and how knowledge is derived in science.

*Teaching Intensive and Accelerated Courses* Raymond

J. Wlodkowski 2010-08-09 In

this comprehensive resource,

Raymond J. Wlodkowski and

Margery B. Ginsberg describe how to meet the challenge of teaching intensive and accelerated courses to nontraditional learners and working adults. By making motivation and cultural relevance essential to instruction, they clearly show what instructors can do to enhance learning in classes that can last from three to six hours. *Teaching Intensive and Accelerated Courses* makes full use of the authors' twenty years of experience researching and teaching accelerated courses, along with selected strategies from Wlodkowski's classic *Enhancing Adult Motivation to Learn*, to offer tried-and-true practices instructors can use to provide continuously engaging learning. *Praise for Teaching Intensive and Accelerated Courses* "Part-time teachers who work in accelerated degree programs are an enormous—and grossly underserved—group of adult education faculty. In this indispensable text, Wlodkowski and Ginsberg, two teachers

with extensive firsthand experience of accelerated learning formats, provide an accessible, practical, and highly readable guide to engaging learners in these programs. Warm, wise, and down-to-earth, this will be an invaluable resource for teachers in these programs and for faculty developers everywhere."—Stephen D. Brookfield, Distinguished University Professor, University of St. Thomas, Minnesota "Whether you are an experienced teacher of accelerated courses or about to become a new one, I can't think of a better guide and standard-setter than this book. Wlodkowski and Ginsberg have created an instructional theory with practices that mirror the very principles and processes they advocate. Central to their thesis is the need to create conditions that will allow adults' natural desire to learn to emerge; in my view, this perspective is often lost in adult learning courses in the name of efficiency or productivity. That is one of the

many reasons this book is refreshing in both its approach and the values it espouses."—Pamela Tate, president and CEO, The Council for Adult and Experiential Learning "What a helpful resource for faculty professional development! The information is strategic without being formulaic. New faculty can use this book as a resource to design their materials and to use their existing skills to help adults learn. The parts of this book that focus on graduate students are extremely insightful."—Victoria Gardner, director, Office of Multicultural Affairs, University of Washington School of Medicine

**The Secret Things of God** Dr. Henry Cloud 2014-05-22 The phenomenal bestseller, *The Secret*, tapped into a spiritual hunger present in our society, revealing the Law of Attraction as a way to improve your life and find harmony with universal energies. Dr Cloud builds on these ideas by offering a positive Christian interpretation of the thinking found in that book. By

comparing ideas and concepts in *The Secret* with biblical scripture, he points readers to the Creator of the universe as the source of all power, offering twenty spiritual truths that hold within them the secrets of happiness, relationships and purpose. Yet even among those who claim a Christian faith, these truths often lie dormant and untapped within the soul. *The Secret Things of God* will help readers unlock the secret treasures God has for them, and gives guidance on how to activate these truths in our lives.

Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation

recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

*How To Do Things With Logic*  
C. Grant Luckhardt 2014-02-25

In the past 15 years a host of critical thinking books have appeared that teach students to find flaws in the arguments of others by learning to detect a number of informal fallacies. This book is not in that tradition. The authors of this book believe that while students learn to become vicious critics, they still continue to make the very mistakes they criticize in others. Thus, this book has adopted the approach of teaching the construction of good arguments first and then introducing criticism as a

secondary skill. Moreover, the emphasis of the book is not on learning to name fallacies, but on being able to identify weaknesses in an argument so as to be able to construct an effective critique of that argument. The book is accompanied by a workbook featuring a wealth of examples to help students acquire the material.

The Yellow Wallpaper Illustrated Charlotte Perkins Gilman 2021-06-14 "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves

into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

**Critique** L. Ogundipe 2005

The text is presented in chunks of approximately 10 True/False questions on specific concepts in research methodology and statistics. This is followed by clear explanations, from first principles, that assume no

prior knowledge. This book is for the paper critique section of the MRCPsych 2 examination but clinical tutors, organisers of journal clubs and clinicians interested in research will find the book helpful. It is particularly invaluable for clinicians interested in evidence based medicine. This book is intended to be used as an aide memoir, carried in the pocket and referred to as often as necessary. It enables self-assessment to be carried out in the hope that any gaps in knowledge will be identified. Much of this book focuses on practical application of statistical and research methodology concepts into critical paper reading. The reader is encouraged to attempt the questions before the reading the suggested answers.
