The Cubans Anthony DePalma 2020-05-26 "[DePalma] renders a Cuba few tourists will ever see . . . You won't forget these people soon, and you are bound to emerge from DePalma's bighearted account with a deeper understanding of a storied island . . . A remarkably revealing glimpse into the world of a muzzled yet irrepressibly ebullient neighbor."--The New York Times Modern Cuba comes alive in a vibrant portrait of a group of families's varied journeys in one community over the last twenty years. Cubans today, most of whom have lived their entire lives under the Castro regime, are hesitantly embracing the future. In his new book, Anthony DePalma, a veteran reporter with years of experience in Cuba, focuses on a neighborhood across the harbor from Old Havana to dramatize the optimism as well as the enormous challenges that Cubans face: a moving snapshot of Cuba with all its contradictions as the new regime opens the gate to the capitalism that Fidel railed against for so long. In Guanabacoa, longtime residents prove enterprising in the extreme. Scrounging materials in the black market, Cary Luisa Limonta Ewen has started her own small manufacturing business, a surprising turn for a former ranking member of the Communist Party. Her good friend Lili, a loyal Communist, heads the neighborhood's watchdog revolutionary committee. Artist Arturo Montoto, who had long lived and worked in Mexico, moved back to Cuba when he saw improving conditions but complains like any artist about recognition. In stark contrast, Jorge García lives in Miami and continues to seek justice for the sinking of a tugboat full of refugees, a tragedy that claimed the lives of his son, grandson, and twelve other family members, a massacre for which the government denies any role. In The Cubans, many patriots face one new question: is their loyalty to the revolution, or to their country? As people try to navigate their new reality, Cuba has become an improvised country, an old machine kept running with equal measures of ingenuity and desperation. A new kind of revolutionary spirit thrives beneath the conformity of a half century of totalitarian rule. And over all of this looms the United States, with its unpredictable policies, which warmed towards its neighbor under one administration but whose policies have now taken on a chill reminiscent of the Cold War.

Evaluating Police Uses of Force Seth W. Stoughton 2021-02-01 Provides a critical understanding and evaluation of police tactics and the use of force Police violence has historically played an important role in shaping public attitudes

toward the government. Community trust and confidence in policing have been undermined by the perception that officers are using force unnecessarily, too frequently, or in problematic ways. The use of force, or harm suffered by a community as a result of such force, can also serve as a flashpoint, a spark that ignites long-simmering community hostility. In *Evaluating Police Uses of Force*, legal scholar Seth W. Stoughton, former deputy chief of police Jeffrey J. Noble, and distinguished criminologist Geoffrey P. Alpert explore a critical but largely overlooked facet of the difficult and controversial issues of police violence and accountability: how does society evaluate use-of-force incidents? By leading readers through answers to this question from four different perspectives—constitutional law, state law, administrative regulation, and community expectations—and by providing critical information about police tactics and force options that are implicated within those frameworks, *Evaluating Police Uses of Force* helps situate readers within broader conversations about governmental accountability, the role that police play in modern society, and how officers should go about fulfilling their duties.

Brand Failures Matt Haig 2005 It's not just smaller, lesser-known companies that have launched dud brands. On the contrary, most of the world's global giants have launched new products that have flopped - spectacularly and at great cost. Haig organizes these 100 "'failures'" into ten types which include classic failures (e.g., New Coke), idea failures (e.g., R.J.Reynolds' smokeless cigarettes), extension failures (e.g. Harley Davidson perfume), culture failures (e.g., Kellogs in India), and technology failures (e.g., Pets.com).

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Antistatic Sprays National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Stuff They Don't Want You to Know Ben Bowlin 2022-10-11 Hosts of the podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown discern conspiracy fact from fiction regarding "stuff" the government doesn't want you to know. Conspiracies didn't always seem so clear and present. It used to be that people with tin-foil hats who were convinced of secret messages coming through the radio were easily disregarded as kooks and looney tunes. But these days, conspiracies feel alive and well. From internet rumors to lying politicians to the tinderbox that is social media, it's become remarkably clear that a vast swath of people believe really bonkers things. Why is that? How did these theories proliferate? Is there a kernel of truth to it or are they fully fiction? Ben Bowlin, Matt Frederick, and Noel Brown are the hosts of the popular iHeart podcast that seeks to answer these questions. With cool heads and extensive research, they regularly break down the wildest conspiracy theories: from chemtrails and biological testing to the secrets of lobbying and why the Kennedy assassination is of perennial interest. Written in smart, witty, and conversational style, and with amazing illustrations, Stuff They Don't Want You to Know is a vital book in helping to understand the unexplainable and use truth as a powerful weapon against ignorance, misinformation, and lies.
