### **Narrative Gerontology in Research and Practice**

Kate De Medeiros, PhD  
2013-12-19 What is meant by narrative? How can one elicit a narrative or analyze it in research? How can narrative work best be facilitated among older adults? This is the only text to provide comprehensive information about the applications of narrative approaches in community and long-term settings, writing in the virtual world, and such individual work as journaling or poetry. The book explores the

theories of narratives across many disciplines, research practices and analytical strategies, and applications in work with older adults. It has been written by a prominent researcher of the narrative construction of self in old age, whose studies have been funded by the NIH, the Brookdale Foundation, and the Alzheimerís Association, among other related achievements. The book brings together a unique blend of interdisciplinary perspectives and practices not found in other books on life stories, autobiography, and/or narrative approaches to understanding oneís experiences. Specifically, it focuses on the myriad theoretical underpinnings of narrative, provides a developmental history of

narrative use in gerontology, and details various ways to use narratives in a variety of research settings. Each chapter includes step-by-step guides on who to analyze and report on, and how to write up narrative data. It also discusses ways to incorporate narratives in varied practice settings such as writing workshops in retirement communities, individual writing projects, and others. Key Features: Offers a hands-on research tool that guides the reader from theory to research to practice Describes the theoretical underpinnings and practical applications of narrative with older adults Illustrates how narrative gerontology is fundamentally different in practice than narrative research with younger participants Addresses the breadth of

available narrative methods and how to apply them in a research settings Designed for use in qualitative methods, service learning, and gerontological research courses.

**International Perspectives on Reminiscence, Life Review and Life Story Work** Faith Gibson

2018-11-21 Examining recent research and practice on reminiscence, life review and life story work, this book offers critical accounts of the rapidly growing and extensive global literature, and highlights the continuing relevance and effectiveness of these therapeutic methods. The book includes examples of international practical projects, involving people of all ages, life circumstances, and

levels of physical and cognitive functioning. Contributions from contemporary practitioners and researchers give a nuanced appraisal of the methods of engagement and creativity arising from the purposeful recall of our personal pasts. Chapters include reviews of technology, ethical issues including end of life care, working with people with mental health conditions, and working with people with dementia.

### Narrative Inquiry

Kathleen Wells

2011-01-01 "This Pocket Guide to narrative inquiry will present the method's major theoretical underpinnings; rationales for use of narrative research methods within life history and case study frameworks; primary strategies for

eliciting, listening to, and transcribing first-person oral narratives; prevailing analytic frameworks for analysis of such data; ethical considerations and Institutional Review Board-related challenges in narrative inquiry; and issues pertaining to trustworthiness and theoretical and empirical generalization. The author, an esteemed researcher, will illustrate concepts from her on-going narrative investigation of abusive and neglectful mothers who lost and regained custody of their children within one impoverished community, a useful site from which to discuss issues of memory, trauma, context and process, and narrative truth. References to exemplary published narrative studies of questions of concern to social work

practitioners in the areas of psychotherapy, child welfare practice, and organizational/community practice, for example, will also be included. The volume is designed, in short, to address the issues an investigator would need to consider in order to develop a narrative inquiry: questions of theory, method, and meaning. Yet, it is not proscriptive. It will focus on the topical areas an investigator should address when planning a narrative study, and it provides a summary of two or three ways in which scholars have answered each one. This approach recognizes the connections among epistemology, features of social work problems, and method that defy simple categorization and acknowledges the emergent and interdisciplinary nature

of narrative inquiry."-- Provided by publisher. *Cultural-Existential Psychology* Daniel Sullivan 2016-04-07 Cultural psychology and experimental existential psychology are two of the fastest-growing movements in social psychology. In this book, Daniel Sullivan combines both perspectives to present a groundbreaking analysis of culture's role in shaping the psychology of threat experience. The first part of the book presents a new theoretical framework guided by three central principles: that humans are in a unique existential situation because we possess symbolic consciousness and culture; that culture provides psychological protection against threatening experiences, but also helps to create them;

and that interdisciplinary methods are vital to understanding the link between culture and threat. In the second part of the book, Sullivan presents a novel program of research guided by these principles. Focusing on a case study of a traditionalist group of Mennonites in the midwestern United States, Sullivan examines the relationship between religion, community, guilt, anxiety, and the experience of natural disaster.

**Cultivating Virtue** Nancy E. Snow 2014-12-01

Though virtue ethics is enjoying a resurgence, the topic of virtue cultivation has been largely neglected by philosophers. This volume remedies this gap, featuring mostly new essays, commissioned for this collection, by

philosophers, theologians, and psychologists at the forefront of research into virtue. Each contribution focuses on some aspect of virtue development, either by highlighting virtue cultivation within distinctive traditions of ethical or religious thought, or by taking a developmental perspective to yield fresh insights into criticisms of virtue ethics, or by examining the science that explains virtue development. The essays by Russell and Driver investigate virtue cultivation or problems associated with it from Aristotelian and utilitarian perspectives. Slote addresses virtue development from the sentimentalist standpoint. Swanton and Cureton and Hill explore self-improvement, the

former with an eye to offering solutions to critiques of virtue ethics, the latter from a Kantian ethical vantage point. Slingerland examines contemporary psychology as well as virtue development in the Confucian tradition to counter situationist criticisms of virtue ethics. Flanagan, Bucar, and Herdt examine how virtue is cultivated in the Buddhist, Islamic, and Christian traditions, respectively. Narvaez, Thompson, and McAdams offer descriptive insights from psychology into virtue development. The result is a collection of extremely creative essays that not only fills the current gap but also promises to stimulate new work on a philosophically neglected yet vital topic.

### **Semantics and Psychology**

**of Spirituality** Heinz Streib 2015-10-16 This book examines what people mean when they say they are “spiritual”. It looks at the semantics of “spirituality”, the visibility of reasons for “spiritual” preference in biographies, in psychological dispositions, in cultural differences between Germany and the US, and in gender differences. It also examines the kind of biographical consequences that are associated with “spirituality”. The book reports the results of an online-questionnaire filled out by 773 respondents in Germany and 1113 in the US, personal interviews with a selected group of more than 100 persons, and an experiment. Based on the data collected, it reports results that are

relevant for a number of scientific and practical disciplines. It makes a contribution to the semantics of everyday religious language and to the cross-cultural study of religion and to many related fields as well, because "spirituality" is evaluated in relation to personality, mysticism, well-being, religious styles, generativity, attachment, biography and atheism. The book draws attention to the – new and ever changing – ways in which people give names to their ultimate concern and symbolize their experiences of transcendence.

**Misery** Stephen King  
2016-01-05 After an almost fatal car crash, novelist Paul Sheldon finds himself being nursed by a deranged fan who holds him captive.  
Leading Lives that Matter Mark R. Schwehn

2006 "Leading Lives That Matter" draws together a wide range of texts -- including fiction, autobiography, and philosophy -- offering challenge and insight to those who are thinking about what to do with their lives. Instead of giving prescriptive advice, Mark Schwehn and Dorothy Bass approach the subject of vocation as an ongoing conversation. They include in this conversation some of the Western tradition's best writings on human life - - its meaning, purpose, and significance -- ranging from ancient Greek poetry to contemporary fiction. Including Leo Tolstoy's novella "The Death of Ivan Ilych" as an extended epilogue, this volume will help readers clarify and deepen how they think about their own lives.

**Narrative - State of the**

Narrative □ State of the  
Art which was originally  
published as a Special  
Issue of Narrative  
Inquiry 16:1 (2006) is  
edited by Michael  
Bamberg and contains 24  
chapters (with a brief  
introduction by the  
editor) that look back  
and take stock of  
developments in  
narrative theorizing and  
empirical work with  
narratives. The attempt  
has been made to bring  
together researchers  
from different  
disciplines, with very  
different concerns, and  
have them express their  
conceptions of the  
current state of the art  
from their perspectives.  
Looking back and taking  
stock, this volume  
further attempts to  
begin to deliver answers  
to the questions (i)  
What was it that made  
the original turn to  
narrative so successful?

(ii) What has been  
accomplished over the  
last 40 years of  
narrative inquiry? (iii)  
What are the future  
directions for narrative  
inquiry? The  
contributions to this  
volume are deliberately  
kept short so that the  
readers can browse  
through them and get a  
feel about the diversity  
of current narrative  
theorizing and emerging  
new trends in narrative  
research. It is the  
ultimate aim of this  
edited volume to stir up  
discussions and dialogue  
among narrative  
researchers across these  
disciplines and to widen  
and open up the  
territory of narrative  
inquiry to new and  
innovative work.  
*Non-Equilibrium Social  
Science and Policy*  
Jeffrey Johnson  
2017-01-20 The overall  
aim of this book, an  
outcome of the European  
FP7 FET Open NESS

project, is to contribute to the ongoing effort to put the quantitative social sciences on a proper footing for the 21st century. A key focus is economics, and its implications on policy making, where the still dominant traditional approach increasingly struggles to capture the economic realities we observe in the world today - with vested interests getting too often in the way of real advances. Insights into behavioral economics and modern computing techniques have made possible both the integration of larger information sets and the exploration of disequilibrium behavior. The domain-based chapters of this work illustrate how economic theory is the only branch of social sciences which still holds to its old

paradigm of an equilibrium science - an assumption that has already been relaxed in all related fields of research in the light of recent advances in complex and dynamical systems theory and related data mining. The other chapters give various takes on policy and decision making in this context. Written in nontechnical style throughout, with a mix of tutorial and essay-like contributions, this book will benefit all researchers, scientists, professionals and practitioners interested in learning about the 'thinking in complexity' to understand how socio-economic systems really work.

*Dare, Dream, Do* Whitney L. Johnson 2016-10-21 Thinkers50 Management Thinker of 2015 Whitney Johnson has a goal: to help us identify and achieve our dreams. Her

belief is that we can each achieve greater happiness when focusing both on our dreams and on other people in our lives. In this inspiring book, Johnson directs her attention to teaching women, in particular, a three-step model for personal advancement and happiness. She first encourages us to Dare to boldly step out, to consider disrupting life as we know it. Then she teaches us how to Dream, to give life to the many possibilities available, whether to start a business, run a marathon, or travel the world. She shows us how to "date" our dreams (no need to commit!) and how to make space for dreams. Finally, Whitney's model brings out the businesswoman in her; she teaches us to Do, to execute our dreams. She showcases the importance of

sharing dreams with others to give them life, creating your own "dream team." Rich with real stories of women who have dared to dream, Dare, Dream, Do offers a practical framework for making remarkable things happen.

**Identity and Story** Henry Wade Rogers Professor of Psychology and Chair of the Psychology Department Dan P McAdams, PhD 2006 The editors bring together an interdisciplinary and international group of creative researchers and theorists to examine the way the stories we tell create our identities. The contributors to this volume explore how, beginning in adolescence and young adulthood, narrative identities become the stories we live by.

**Soon** Pam Durban 2015-05-01 The award-winning author's "gorgeously-crafted

second collection of stories” explores moments of profound loss, discovery, and transition (Charlotte Observer). The stories in this volume explore the myriad ways people lose, find, and hold on to one another. When all else fails her characters—science, religion, family, self—the powerful act of storytelling keeps their broken lives together. Each story in this rewarding and multifaceted collection introduces people who yearn for better lives and find themselves entangled in the hopes and dreams that heal and bind us all. The title story—chosen by John Updike for *The Best American Short Stories of the Century* anthology—follows two generations of a family driven by the “patient and brutal need that people called hope.” In

“The Jap Room,” winner of the 2008 Goodheart Prize, a woman tries to help her WWII veteran husband finally come home. “Rowing to Darien” introduces a famous English actress as she rows away from her husband’s rice plantation. In “Hush” a gravely ill man encounters himself in the darkness of Kentucky’s Mammoth Cave. These and other stories deftly broach universal themes of love, loss, and the redemptive power of storytelling. Foreword by the Flannery O’Connor Prize-winning author Mary Hood  
*The Narrative Study of Lives* Ruthellen H. Josselson 1997-05-31 The narrative approach is a relevant and enriching technique for uncovering, describing and interpreting the meaning of experience. This collection explores the challenges of

performing narrative work in an academic setting, writing about it in an ethical and revealing fashion, and drawing meaningful conclusions. This stellar collection of scholars examine such topics as: how the larger construct of 'personality' can read out of a life story; the development of multicultural identity as a dynamic process; the transition away from delinquent behaviour; the importance of cultural continuity for understanding loneliness in elderly refugees; race relations and how it relates to the meaning of the decade in which the interviewee

scholarship and a radical act of empathy."—Esquire "A ray of light into those isolated cocoons of darkness that, at one time or another, may afflict us all." —The Wall Street Journal "Essential."—The Boston Globe A landmark exploration of one of the most consequential and mysterious issues of our time: the rise of chronic illness and autoimmune diseases A silent epidemic of chronic illnesses afflicts tens of millions of Americans: these are diseases that are poorly understood, frequently marginalized, and can go undiagnosed and unrecognized altogether. Renowned writer Meghan O'Rourke delivers a revelatory investigation into this elusive category of "invisible" illness that encompasses autoimmune diseases, post-treatment

Lyme disease syndrome, and now long COVID, synthesizing the personal and the universal to help all of us through this new frontier. Drawing on her own medical experiences as well as a decade of interviews with doctors, patients, researchers, and public health experts, O'Rourke traces the history of Western definitions of illness, and reveals how inherited ideas of cause, diagnosis, and treatment have led us to ignore a host of hard-to-understand medical conditions, ones that resist easy description or simple cures. And as America faces this health crisis of extraordinary proportions, the populations most likely to be neglected by our institutions include women, the working class, and people of color. Blending lyricism

and erudition, candor and empathy, O'Rourke brings together her deep and disparate talents and roles as critic, journalist, poet, teacher, and patient, synthesizing the personal and universal into one monumental project arguing for a seismic shift in our approach to disease. The Invisible Kingdom offers hope for the sick, solace and insight for their loved ones, and a radical new understanding of our bodies and our health. **George W. Bush and the Redemptive Dream** Dan P. McAdams 2010-11-30 George W. Bush remains a highly controversial figure, a man for whom millions of Americans have very strong feelings. Dan McAdams' book offers an astute psychological portrait of Bush, one of the first biographies to appear since he left

office as well as the first to draw systematically from personality science to analyze his life. McAdams, an international leader in personality psychology and the narrative study of lives, focuses on several key events in Bush's life, such as the death of his sister at age 7, his commitment to sobriety on his 40th birthday, and his reaction to the terrorist attacks of September 11, and his decision to invade Iraq. He sheds light on Bush's life goals, the story he constructed to make sense of his life, and the psychological dynamics that account for his behavior. Although there are many popular biographies of George W. Bush, McAdams' is the first true psychological analysis based on established theories and the latest

research. Short and focused, written in an engaging style, this book offers a truly penetrating look at our forty-third president. The Redemptive Self Dan P. McAdams 2013-02-14 In this revised and expanded edition of The Redemptive Self, McAdams shows how redemptive stories promote psychological health and civic engagement among contemporary American adults. Religion and Organization Theory 2014-04-02 Despite the profound influence that religious organizations exert, religion occupies a curiously marginal place in organization theory. This volume aims to make available in one place existing knowledge on religion and organizations, encouraging more organization theorists to include religion as part of their research

activities and agenda.  
**Fenicus Flint & the Dragons of Berathor** C W J Henderson 2013-01-12  
Fenicus Flint, a young dragon, lives with the last of his fading species in a secluded mountain sanctuary known as Berathor Valley. When he awakens from an accident that leaves him injured and temporarily unable to fly, Fenicus discovers that the peace and tranquility of his homeland has been shattered; Berathor is in ruins and his loved ones abducted. With few clues to guide him, the young dragon embarks on a dangerous quest beyond the sheltering walls of his homeland to find his loved ones before their flame is extinguished forever.

**Pastoral Care** Karen D. Scheib 2016-02-16  
Christian pastoral care is a narrative, ecclesial, theological practice (NET). As a

narrative practice, pastoral care attends to the inseparable interconnection between our own lifestories, others' stories, the larger cultural stories, and God's story. As a ministry of the church, pastoral care is an ecclesial practice that derives its motivation, purpose, and identity from the larger mission of the church to bear witness to and embody God's mission of love that extends beyond the church for the transformation of the world. As a theological practice, pastoral care is grounded in God's love story. God's profound love for humankind heals our brokenness when human love fails and invites us into an ongoing process of growth in love of God, self, and neighbor. Intended for those who provide care with and on behalf of

religious communities, author Karen Scheib focuses on listening and “restorying” practices occurring in the context and setting of congregations. By coauthoring narratives that promote healing and growth in love, pastoral caregivers become cocreators and companions who help others revise and construct life-stories reshaped by the grace of God. What Karen Scheib has done in this book is to reposition pastoral care as a theological activity performed in the context of the church. She draws deeply upon her Wesleyan theological heritage, upon an understanding of life in its fullness as growth in love and grace, and upon a “communion ecclesiology” undergirded by a communal understanding of the Trinitarian life of God. Thus grounded,

she envisions pastoral care first as a rhythm of the life of the whole church and secondarily as a work of trained pastors. In her vision, pastoral care is rescued from a narrow understanding of it as exceptional acts of intervention performed only in moments of dire crisis. Instead, it becomes a “daily practice of pastoral care,” an attending, in love, to the stories of others and a “listening for ways God is already present in a life story.” Solidly theological, grounded in the life of the church, and eminently teachable – Karen Scheib has given us a great gift in this book.” from the Foreword -Thomas G. Long, Bandy Professor of Preaching, Emeritus, Candler School of Theology, Emory University, Atlanta, GA. "In a wonderfully engaging, reflective,

and useful way, Karen Scheib captures something absolutely essential to pastoral care and yet often overlooked—the utter centrality of storytelling/listening, the power of stories to heal, and their vital connection to bigger stories told within religious communities. This book is a real milestone, reclaiming the importance of “narrative knowing” and grounding care not only in community but also within a comprehensive theological framework.” --Bonnie J. Miller-McLemore, E. Rhodes and Leona B. Carpenter Professor of Religion, Psychology, and Culture, The Divinity School and Graduate Department of Religion, Vanderbilt University Divinity School, Nashville, TN “Implementing narrative personality and therapy theories and anchored in

ecclesiology and Wesleyan theology (NET), Karen Scheib’s book advances a long awaited and holistic approach to pastoral care. Her NET approach presents the embodiment of pastoral care by emphasizing both narrative and paradigmatic knowing, proposes the subjectivity of our stories in pastoral care by pointing out the interchangeability between us and our stories as subject and object, and underscores the dynamic process of pastoral care through the interconnection of the storyteller, listener, and context. Scheib’s image of story companion contributes to the field as a new paradigm of pastoral care and promises to be a significant resource in generating hope and growth in love for both pastoral caregiver and receiver.” –Angella Son,

Associate Professor, Drew University, Madison, NJ "Pastoral theologian Scheib describes a narrative, ecclesial, and theological approach for listening to people's life stories in such a way as to engender spiritual formation and growth in love. Scheib clarifies the connections between caring conversations and Christian theology. Clear and accessible prose as well as helpful exercises and discussion starters make this a fine teaching text." - The Christian Century, Sept. 29, 2016.

**Personality Psychology**  
Jim McMartin 2016-01-29  
Personality Psychology: A Student-Centered Approach organizes the field of personality psychology around basic questions relevant to the reader's past, present, and future selves. Answers to the

questions are based on findings from up-to-date research and shed light on the validity of personality theories to help students deepen their understanding of their own personalities. Concise, conversational, and easy-to-understand, the Second Edition is enhanced with new chapters, new research that reflects the latest scholarship, and new photos and illustrations throughout.

**The Person** Dan P. McAdams 2008-12-22  
The Person provides psychologists with an organizational scheme for personality psychology. This sets the study of the person into evolutionary and cultural context and divided personality up into three broad areas: dispositional traits, characteristic adaptations, and integrative life stories. The fifth

edition has been updated to reflect advances that have occurred in the field of psychology in the past few years. It presents new findings that have been obtained with respect to the correlates of personality traits, the dynamics of motives and goals in human lives, and the meanings and manifestations of life stories. Discussions are included on the new ideas on evolution and morality as well as the role of culture in personality.

Psychologists will also find a much stronger and detailed discussion of psychophysiology of extraversion, neuroticism, and the train of sensation-seeking.

*Darwin's Bridge* Joseph

Carroll 2016 *Darwin's Bridge: Uniting the Humanities and Sciences* explores the meaning of consilience and considers the unity of human evolution, human nature, social dynamics, art, and narrative. The term "consilience" in its modern usage was first established by co-editor Edward O. Wilson in his 1998 book, *Consilience: The Unity of Knowledge*. Wilson's original thesis had two parts: that nature forms a unitary order of causal forces, hierarchically organized, and that scientific knowledge, because it delineates nature, also forms a unitary order, providing a unity of knowledge across a variety of fields. Bringing together cutting-edge scientists and scholars across this range, this volume gives an expert account of consilience

and makes it possible to see how far we have come toward unifying knowledge about the human species, what major issues are still in contention, and which areas of research are most likely to produce further progress. The essays in Darwin's Bridge raise and give substantial answers to questions such as: What is the precise trajectory of human evolution? What were the main factors driving the evolution of the human brain and human motivational system? How closely does life among contemporary hunter-gatherers mirror conditions of ancestral life? In what ways have genes and culture co-evolved, reciprocally influencing one another? How does selection at the level of individuals interact with selection among groups? How complete and adequate

are our current models of human nature? How well do these models integrate ideas about human universals, individual identity, and specific cultures? How well can we now delineate the causal chains leading from elementary principles of evolutionary biology to specifically human forms of social organization, individual identity, and imaginative culture? Are human proclivities to make and consume works of art by-products of adaptations, or are they themselves adaptations? Can evolutionary thinking guide us in giving close analytic and explanatory attention to individual works of art? *Culturally Sensitive Narrative Interventions for Immigrant Children and Adolescents* Giselle B. Esquivel 2010 "In this informative and charming book, the

authors demonstrate the power of narrative to address tough personal and cultural issues that immigrant children and adolescents face today. They show how storytelling---from poetry to puppetry---can bring young people together within a culture while opening them up to the complex, multicultural world that is contemporary America. Written with erudition and passion, this book is a wonderful resource for teachers, counselors, school psychologists, and others who want to make a positive difference in the lives and the life stories of immigrant youth."---Dan P. McAdams, author of *The Redemptive Self: Stories Americans Live By* -- Everyman News Michele Weldon 2008 "Examines how newspapers have changed over the past few years, becoming

story papers. Comparing 850 stories, story approaches, and unofficial sourcing in twenty American newspapers from 2001 and 2004, Weldon reveals a shift toward features over hard news, along with an increase in anecdotal or humanistic approaches to all stories"--Provided by publisher.

**The Redemptive Self** Dan P. McAdams 2006

The Leader Charles B. Strozier 2011-05-24 Behind every leader is an instructive life story. It often promotes a public image that inspires others to live by it. And, sometimes, even to live or to die for it. As leadership qualities and image issues gain significance in the public discourse, the psychological study of leadership is a critical factor in any discussion. With its trenchant insights into

leaders past and present, *The Leader: Psychological Essays, Second Edition*, updates a pioneering text in this field and provides a solid basis for ongoing dialogue on this important subject. Within the context of the ever-evolving disciplines of psychoanalysis and psychodynamics, this thought-provoking volume examines the lives of several prominent leaders from ancient Greece through the start of the 21st century. The authors explore how these leaders imposed their individual missions and mystiques on others, thereby fulfilling – and, sometimes, creating – distinct needs in their followers. The volume brings into vivid focus issues with the potential for devastating consequences on the global stage.

Coverage includes: Biblical times, ancient Greeks and the seeds of leadership. Lincoln during the 1850s, leading a dividing nation. Thomas A. Kohut on Kaiser Wilhelm II and the German national character. George W. Bush, atonement/redemption narratives and the American Dream. Bin Laden, man and myth. A study of paranoid leadership and its implications for future politics and policy. This must-have Second Edition is indispensable reading for researchers, professors, and graduate students across many disciplines, including political psychology, psychoanalysis, history and political science, psychiatry, anthropology, and personality and social psychology. It is important reading for anyone with an interest

in the life stories of leaders past and present and how they affect our world even long after they are gone

The Handbook of Life-Span Development, Volume

1 Richard M. Lerner  
2010-12-14 In the past fifty years, scholars of human development have been moving from studying change in humans within sharply defined periods, to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes. The Handbook of Life-Span Development, Volume 1: Cognition, Biology, and Methods presents the study of human development conducted by the best scholars in the 21st century. Social workers, counselors and public health workers will receive coverage of of the biological and cognitive aspects of human change across the

lifespan.

*Doing Narrative Research*

Molly Andrews 2013-07-22

Written by an international team of experts in the field, the second edition of this popular text considers both the theoretical underpinnings and practical applications of narrative research. The authors take the reader from initial decisions about forms of narrative research, through more complex issues of reflexivity, interpretation and the research context. Existing chapters have been updated to reflect changes in the literature and new chapters from eminent narrative scholars in Europe, Australia and the United States have been added on a variety of topics including narratives and embodiment, visual narratives, narratives

and storyworlds, new media narratives and Deleuzian perspectives in narrative research. This book will be invaluable for all students, researchers and academics looking to use narrative methods in their own social research.

### **Kafka on the Shore**

Haruki Murakami

2005-01-18 Kafka on the Shore displays one of the world's great storytellers at the peak of his powers. Here we meet a teenage boy, Kafka Tamura, who is on the run, and Nakata, an aging simpleton who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly

remarkable journey.

Lovebound Regina Moody

2013-04 Just for a moment imagine yourself the spouse or even the parent of someone in prison. What images come to your mind? In her story, the author challenges us to think outside of our own mindsets. Through the writer's eyes you will see glimpses of what it is really like from the outside looking in. It is her hope that as you read you will not only recognize things that have "imprisoned" you but that you will be set free from those things. Isaiah 61:1 The Spirit of the Lord is upon me because the Lord hath anointed me to preach good tidings unto the meek; he hath sent me to bind up the brokenhearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound... -

**The Strange Case of Donald J. Trump** Dan P. McAdams 2020-02-17 The Strange Case of Donald J. Trump provides a coherent and nuanced psychological portrait of Donald Trump, drawing upon biographical events in the subject's life and contemporary

scientific research and theory in personality, developmental, and social psychology. Dan P. McAdams, renowned psychologist who pioneered the study of lives, examines the central personality traits, personal values and motives, and the interpersonal and cultural factors that together have shaped Trump's psychological makeup, with an emphasis on the strangeness of the case--that is, how Trump again and again defies psychological expectations regarding what it means to be a human being. The book's central thesis is that Donald Trump is the episodic man. The chapters, structured as stand-alone essays each riffing on a single psychological theme, build on each other to present a portrait of a person who compulsively lives in the moment,

without an internal story to integrate his life in time. With an emphasis on scientific personality research, rather than political rhetoric, McAdams shows that Trump's utter lack of an inner life story is truly exceptional. This book is a remarkable case study which should be of as much interest to psychologists as it is to readers trying to reckon with the often confounding behavior and temperament of the 45th President of the United States.

**The Stories We Live by**

Dan P. McAdams

1993-01-01 This book should be value for all those who are interested in enhancing their self-understanding. It should also serve as useful classroom text for undergraduates and advanced students in personality and social psychology, counselling

and psychotherapy.

BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all

proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh,

emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

**In the Course of a Lifetime** Michele Dillon  
2007-03-20 *In the Course of a Lifetime* provides an unprecedented portrait of the dynamic role religion plays in the everyday experiences of Americans over the course of their lives. The book draws from a unique sixty-year-long study of close to two hundred mostly Protestant and Catholic men and women who were born in the 1920s and interviewed in adolescence, and again in the 1950s, 1970s, 1980s, and late 1990s. Woven throughout with rich, intimate life stories, the book presents and analyzes a wide range of data from

this study on the participants' religious and spiritual journeys. A testament to the vibrancy of religion in the United States, *In the Course of a Lifetime* provides an illuminating and sometimes surprising perspective on how individual lives have intersected with cultural change throughout the decades of the twentieth century.

*Pursuing Happiness: Reading American Romance as Political Fiction*

Laura Vivanco 2016-02-01 The dominance of popular romance in the United States fiction market suggests that its trends and themes may reflect the politics of a significant proportion of the population. *Pursuing Happiness* explores some of the choices, beliefs and assumptions which shape the politics of American Romance novels. In

particular, it focuses on what romances reveal about American attitudes towards work, the West, race, gender, community cohesion, ancestral "roots" and a historical connection (or lack of it) to the land.

*White Noise* Don DeLillo 1999-06-01 A brilliant satire of mass culture and the numbing effects of technology, *White Noise* tells the story of Jack Gladney, a teacher of Hitler studies at a liberal arts college in Middle America. Jack and his fourth wife, Babette, bound by their love, fear of death, and four ultramodern offspring, navigate the rocky passages of family life to the background babble of brand-name consumerism. Then a lethal black chemical cloud, unleashed by an industrial accident, floats over their lives, an "airborne toxic event" that is a more

urgent and visible version of the white noise engulfing the Gladneys—the radio transmissions, sirens, microwaves, and TV murmurings that constitute the music of American magic and dread.

*A Place to Stand* Jimmy Santiago Baca 2007-12-01 The Pushcart Prize-winning poet's memoir of his criminal youth and years in prison: a "brave and heartbreaking" tale of triumph over brutal adversity (The Nation). Jimmy Santiago Baca's "astonishing narrative" of his life before, during, and immediately after the years he spent in the maximum-security prison garnered tremendous critical acclaim. An important chronicle that "affirms the triumph of the human spirit," it went on to win the prestigious 2001 International Prize

(Arizona Daily Star). Long considered one of the best poets in America today, Baca was illiterate at the age of twenty-one when he was sentenced to five years in Florence State Prison for selling drugs in Arizona. This raw, unflinching memoir is the remarkable tale of how he emerged after his years in the penitentiary—much of it spent in isolation—with

the ability to read and a passion for writing poetry. “Proof there is always hope in even the most desperate lives.” —Fort Worth Star-Telegram “A hell of a book, quite literally. You won’t soon forget it.” —The San Diego U-T “This book will have a permanent place in American letters.” —Jim Harrison, New York Times—bestselling author of A Good Day to Die
