On Vanishing Lynn Casteel Harper 2020-04-14 An essential book for those coping with Alzheimer’s and other cognitive disorders that “reframe[s] our understanding of dementia with sensitivity and accuracy . . . to grant better futures to our loved ones and ourselves” (Parul Sehgal, The New York Times). An estimated fifty million people in the world suffer from dementia. Diseases such as Alzheimer’s erase parts of one’s memory but are also often said to erase the self. People don’t simply die from such diseases; they are imagined, in the clichés of our era, as vanishing in plain sight, fading away, or enduring a long goodbye. In On Vanishing, Lynn Casteel Harper, a Baptist minister and nursing home chaplain, investigates the myths and metaphors surrounding dementia and aging, addressing not only the indignities caused by the condition but also by the rhetoric surrounding it. Harper asks essential questions about the nature of our outsized fear of dementia, the stigma this fear may create, and what it might mean for us all to try to “vanish well.” Weaving together personal stories with theology, history, philosophy, literature, and science, Harper confronts our elemental fears of disappearance and death, drawing on her own experiences with people with dementia both in the American healthcare system and within her own family. In the course of unpacking her own stories and encounters—of leading a prayer group on a dementia unit; of meeting individuals dismissed as “already gone” and finding them still possessed of complex, vital inner lives; of witnessing her grandfather’s final years with Alzheimer’s and discovering her own heightened genetic risk of succumbing to the disease—Harper engages in an exploration of dementia that is unlike anything written before on the subject. A rich and startling work of nonfiction, On Vanishing reveals cognitive change as it truly is, an essential aspect of what it means to be mortal.

Studies show that you can get more done - and do it better - by doing less, just by consciously unplugging for a few minutes each day and meditating. This revolutionary book by the founder and CEO of the groundbreaking LA-based meditation studio Unplug Meditation brilliantly simplifies this powerful practice and shows the overwhelmed and overworked how easy it is to unplug in order to relieve stress, regain focus, and recharge. Schwartz debunks the common misperceptions about meditation, including the notion that you need to sit still for long periods of time, or that you need to “turn off your brain.” She also shares the life-changing benefits you will experience, the proven science of how meditation literally changes your brain, as well as easy techniques and tips to easily incorporate meditation into your daily life.

The Solace of Fierce Landscapes Belden C. Lane 2007-02-26 In the tradition of Kathleen Norris, Terry Tempest Williams, and Thomas Merton, The Solace of Fierce Landscapes explores the impulse that has drawn seekers into the wildness for centuries and offers eloquent testimony to the healing power of mountain silence and desert indifference. Interweaving a memoir of his mother’s long struggle with Alzheimer’s and cancer, meditations on his own wilderness experience, and illuminating commentary on the Christian via negativa—a mystical tradition that seeks God in the silence beyond language—Lane rejects the easy affirmations of pop spirituality for the harsher but more profound truths that wildness can teach us. “There is an unaccountable solace that fierce landscapes offer to the soul. They heal, as well as mirror, the brokenness we find within.” It is this apparent paradox that lies at the heart of this remarkable book: that inhuman landscapes should be the source of spiritual comfort. Lane shows that the very indifference of the wilderness can release us from the demands of the endlessly anxious ego, teach us to ignore the inessential in our own lives, and enable us to transcend the “false self” that is ever-obsessed with managing impressions. Drawing upon the wisdom of St. John of the Cross, Meister Eckhardt, Simone Weil, Edward Abbey, and many other Christian and non-Christian writers, Lane also demonstrates how those of us cut off from the wildness might “make some desert” in our lives. Written with vivid intelligence, narrative ease, and a gracefulness that is itself a comfort, The Solace of Fierce Landscapes gives us not only a description but a “performance” of an ancient and increasingly relevant spiritual tradition.

Canadian Graphic Candida Rifkind 2016-05-15 Canadian Graphic: Picturing Life Narratives presents critical essays on contemporary Canadian cartoonists working in graphic life narrative, from confession to memoir to biography. The contributors draw on literary theory, visual studies, and cultural history to show how Canadian cartoonists have become so prominent in the international market for comic books based on real-life experiences. The essays explore the visual styles and storytelling techniques of Canadian cartoonists, as well as their shared concern with the spectacular vulnerability of the self. Canadian Graphic also considers the role of graphic life narratives in reimagining the national past, including Indigenous-settler relations, both world wars, and Quebec’s Quiet Revolution. Contributors use a range of approaches to analyze the political, aesthetic, and narrative tensions in these works between self and other, memory and history, individual and collective. An original contribution to the study of auto/biography, alternative comics, and Canadian print culture, Canadian Graphic proposes new ways of reading the intersection of comics and auto/ biography both within and across national boundaries.

Stars Go Blue Laura Pritchett 2014-05-19 Laura Pritchett is an award-winning author who has quickly become one of the west’s defining literary voices. We first met hardscrabble ranchers Renny and Ben Cross in Laura’s debut collection, and now in Stars Go Blue, they are estranged, elderly spouses living on opposite ends of their sprawling ranch, faced with the particular decline of a fading farm and Ben’s struggle with Alzheimer’s disease. He is just on the cusp of dementia, able to recognize he is sick but unable to do anything about it—the notes he leaves in his pockets and around the house to remind him of himself, his family, and his responsibilities are no longer as helpful as they used to be. Watching his estranged wife forced into care-taking and brought to her breaking point, Ben decides to leave his life with whatever dignity and grace remains. As Ben makes his decision, a new horrible truth comes to light: Ray, the abusive husband of their late daughter is being released from prison early. This opens old wounds in Ben, his wife, his surviving daughter, and four grandchildren. Branded with a need for justice, Ben must act before his mind leaves him, and sets off during a brutal snowstorm to confront the man who murdered his daughter. Renny, realizing he is missing, sets off to either stop or witness her husband’s act of vengeance. Stars Go Blue is a triumphant novel of the American family, buffered by the workings of a ranch and the music offered by the landscape and animal life upon it.

Mind Thief Han Yu 2021-03-02 Alzheimer’s disease, a haunting and harrowing ailment, is one of the world’s most common causes of death. Alzheimer’s lingers for years, with patients’ outward appearance unaffected while their cognitive functions fade away. Patients lose the ability to work and live independently, to remember and recognize. There is still no proven way to treat Alzheimer’s because its causes remain unknown. Mind Thief is a comprehensive and engaging history of Alzheimer’s that demystifies efforts to understand the disease. Beginning with the discovery of “presenile dementia” in the early twentieth century, Han Yu examines over a century of research and controversy. She presents the leading hypotheses for what causes Alzheimer’s; discusses each hypothesis’s tangled origins, merits, and gaps; and details their successes and failures. Yu synthesizes a vast amount of medical literature, historical studies, and media interviews, telling the gripping stories of researchers’ struggles while situating science in its historical, social, and cultural contexts. Her chronicling of the trajectory of Alzheimer’s research deftly balances rich scientific detail with attention to the wider implications. In narrating the attempts to find a treatment, Yu also offers a critical account of research and drug development and a consideration of the philosophy of aging. Wide-ranging and accessible, Mind Thief is an important book for all readers interested in the challenge of Alzheimer’s.

The Next Apocalypse Chris Begley 2021-11-16 In this insightful book, an underwater archaeologist and survival coach shows how understanding the collapse of civilizations can help us prepare for a troubled future.

Pandemic, climate change, or war: our era is ripe with the odor of doomsday. In movies, books, and more, our imaginations run wild with visions of dreadful, abandoned cities and returning to the land in a desperate attempt at survival. In The Next Apocalypse, archaeologist Chris Begley argues that we completely misunderstand how disaster works. Examining past collapses of civilizations, such as the Maya and Rome, he argues that these breakdowns are actually less about cataclysmic destruction than they are about long processes of change. In short: it’s what happens after the initial uproar that matters. Some people abandon their homes and neighbors; others band together to start anew. As we anticipate our own fate, Begley tells us that it was communities, not lone heroes, who survived past apocalypses—and who will survive the next. Fusing archaeology, survivalism, and social criticism, The Next Apocalypse is an essential read for anxious times.

Ministry with the Forgotten Kenneth L. Carder 2019-09-17 Dementia diseases represent a crisis of faith for many family members and congregations. Magnifying this crisis is the way people with dementia tend to be objectified by both medical and religious communities. They are recipients of treatment and projects for mission. Ministry is done to and for them rather than with them. While acknowledging the devastation of dementia diseases, Ken Carder draws on his own experience as a caregiver, hospice chaplain, and pastoral practitioner to portray the gifts as well as the challenges accompanying dementia diseases. He confronts the deep personal and theological questions created by loving people with dementia diseases, demonstrating how living with dementia can be a means of growing in faith, wholeness, and ministry for the entire community of faith. He also reveals that authentic faith transcends intellectual beliefs, verbal affirmations, and prescribed practices. Carder asserts that the Judeo-Christian tradition offers a broader lens, defining personhood in relationship to God’s story and humanity’s participation in God’s mighty acts of creation and new creation; thereby contributing to hope, community, and self-worth. Pastors and congregations will be better equipped to minister with people affected by dementia, receiving their gifts and responding to their unique needs. They will learn how people with dementia contribute to the community and the church’s life and mission, discovering practical ways those contributions can be identified, nurtured, and incorporated into the church’s life and ministry.

A Guide to the Spiritual Dimension of Care for People with Alzheimer’s Disease and Related Dementia Eileen Shamy 2003-02-15 ‘This is a book for those actively engaged in or interested in spiritual ministry to persons with dementia. Shamy draws heavily upon her experience, making this book very personal in its approach. I appreciated this style, feeling that the anecdotes anchor the book in the realm of what can be done rather than the theoretical world of the “maybes”. The main concepts of the book, those of spirituality, retained through dementia, and personal worth should be acceptable to people of most world faiths.’ - Leveson Newsletter ‘This is an important book that has much to offer at a variety of different levels. It ranges from deep philosophical thinking to practical recommendations... a book that should be bought, digested and used frequently.’ - Christian Council on Ageing ‘Contains valuable material. The passages that attempt a definition of spirituality, and the stories about persons with dementia and how they have been helped to greater well-being, are relevant and excellently done. The spirit of Eileen Shamy shines out from these pages and carries its own message of passionate concern. One of the book’s greatest strengths is its stories, which are unfailingly well-told and apposite.’ - Ageing and Society Drawing on her years of experience as a clergywoman working with older people in care settings, Eileen Shamy discusses how pastoral work can help to develop holistic care for those suffering from dementia and related conditions - care which involves understanding of their spiritual as well as physical needs. This sensitive and informative book provides guidelines for pastoral visits to people with dementia, showing how to empathise with, understand and support individuals during a visit. Emphasising the importance of retaining dignity and freedom of choice for people with dementia, it also presents practical advice about memory cueing and provides frameworks for leading worship for those with dementia. A useful resource for a variety of people involved in pastoral care with older people, whether professionals or volunteers, this book provides inspiration from a respected author in the field of psychogeriatric care.
